

```
package com.sxt.adapter;

/**
 * 用户端类
 * @author 江
 *
 */

public class Client {

    public void test01(Target t) {
        t.handleReq();
    }

    public static void main(String[] args) {
        Client c=new Client();

        Adaptee e=new Adaptee();

        //        Target t=new Adapter01();
        Target t=new Adapter02(e);

        c.test01(t);
    }
}
```
