

```
package com.sxt.iterator;

public class Client {
    public static void main(String[] args) {
        ConcreteMyAggregate cma=new ConcreteMyAggregate();
        cma.add("aa");
        cma.add("bb");
        cma.add("cc");

        MyIterator myIterator=cma.createIterator();
        while(myIterator.hasNext()) {
            System.err.println(myIterator.getCurrentobj());
            myIterator.next();
        }
    }
}
```
