

```
package com.builder.improve;
```

```
// 抽象的建造者
```

```
public abstract class HouseBuilder {
```

```
    protected House house = new House();
```

```
    //将建造的流程写好, 抽象的方法
```

```
    public abstract void buildBasic();
```

```
    public abstract void buildWalls();
```

```
    public abstract void roofed();
```

```
    //建造房子好, 将产品(房子) 返回
```

```
    public House buildHouse() {
```

```
        return house;
```

```
    }
```

```
}
```
