

```
package com.sxt.prototype;

import java.io.Serializable;
import java.util.Date;

public class Sheep02 implements Cloneable, Serializable{    //1997, 英国的克隆羊,
多利!

    private String sname;
    private Date birthday;

    @Override
    protected Object clone() throws CloneNotSupportedException {
        Object obj=super.clone();    //直接调用object对象的clone()方法

        //增加以下代码实现深克隆
        Sheep02 s=(Sheep02)obj;
        s.birthday=(Date)this.birthday.clone();    //实现对属性的克隆

        return s;
    }

    public String getSname() {
        return sname;
    }

    public void setSname(String sname) {
        this.sname = sname;
    }

    public Date getBirthday() {
        return birthday;
    }

    public void setBirthday(Date birthday) {
        this.birthday = birthday;
    }
}
```

```
}
```

```
public Sheep02(String sname, Date birthday) {  
    super();  
    this.sname = sname;  
    this.birthday = birthday;  
}
```

```
public Sheep02() {  
}
```

```
}
```
