

```
package com.sxt.observer;

public class ObserverA implements Observer{
    private int myState; //myState需要跟目标对象的State值保持一致

    @Override
    public void update(Subject subject) {
        myState=((ConcreteSubject)subject).getState();
    }

    public int getMyState() {
        return myState;
    }

    public void setMyState(int myState) {
        this.myState = myState;
    }
}
```
