```
package com.sxt.builder;

public class Client {
    public static void main(String[] args) {
         AirShipDirector director=new SxtAirShipDirector(new SxtAirShipBuilder());

        AirShip ship=director.directAirShip();
        System.err.println(ship.getEngine().getName());

        ship.launch();
}
```
