```java
package com.sxt.proxy.staticProxy;
/**
 * 代理
 * @author DELL
 *
 */

public class ProxyStar implements Star{
    private RealStar star;

    public ProxyStar(RealStar star) {
        this.star=star;
    }

    @Override
    public void confer() {
    System.err.println("RealStar.confer()");
    }

    @Override
    public void singContract() {
        System.err.println("RealStar.singContract()");

    }

    @Override
    public void bookTicket() {
        System.err.println("RealStar.bookTicket()");

    }

    @Override
    public void sing() {
        star.sing();
```

```java
    }

    @Override
    public void collectMoney() {
        System.err.println("RealStar.collectMoney()");
    }

}
```
