```java
package com.state.money;

/**测试类*/
public class ClientTest {

    public static void main(String[] args) {
        // TODO Auto-generated method stub
        //创建context 对象
        Context context = new Context();
        //将当前状态设置为 PublishState
        context.setState(new PublishState());
        System.out.println(context.getCurrentState());

//        //publish --> not pay
        context.acceptOrderEvent(context);
//        //not pay --> paid
        context.payOrderEvent(context);
//        // 失败, 检测失败时，会抛出异常
//        try {
//         context.checkFailEvent(context);
//         System.out.println("流程正常..");
//    } catch (Exception e) {
//        // TODO: handle exception
//        System.out.println(e.getMessage());
//    }

    }

}
```
