```java
package com.sxt.mediator;

public class Client {
    public static void main(String[] args) {
        Mediator m=new President();

        Macket macket=new Macket(m);
        Development devp=new Development(m);
        Finacial f=new Finacial(m);

        macket.selfAction();
        macket.outAction();

    }
}
```
