```java
package com.facade;

public class Screen {

    private static Screen instance = new Screen();

    public static Screen getInstance() {
        return instance;
    }

    public void up() {
        System.out.println(" Screen up ");
    }

    public void down() {
        System.out.println(" Screen down ");
    }

}
```
