```java
package com.strategy.improve;

public class WildDuck extends Duck {

    //构造器，传入FlyBehavor 的对象
    public  WildDuck() {
        // TODO Auto-generated constructor stub
        flyBehavior = new GoodFlyBehavior();
    }

    @Override
    public void display() {
        // TODO Auto-generated method stub
        System.out.println(" 这是野鸭 ");
    }

}
```
