```java
package com.sxt.observer2;

import java.util.Observable;
import java.util.Observer;

public class ObserverA implements Observer{
	private int myState;

		@Override
		public void update(Observable o, Object arg) {
				myState=((ConcreteSubject)o).getState();
		}

		public int getMyState() {
				return myState;
		}

		public void setMyState(int myState) {
				this.myState = myState;
		}
}
```
