```java
package com.prototype.improve;

public class Client {

    public static void main(String[] args) {
        System.out.println("原型模式完成对象的创建");
        // TODO Auto-generated method stub
        Sheep sheep = new Sheep("tom", 1, "白色");

        sheep.friend = new Sheep("jack", 2, "黑色");

        Sheep sheep2 = (Sheep)sheep.clone(); //克隆
        Sheep sheep3 = (Sheep)sheep.clone(); //克隆
        Sheep sheep4 = (Sheep)sheep.clone(); //克隆
        Sheep sheep5 = (Sheep)sheep.clone(); //克隆

        System.out.println("sheep2 =" + sheep2 + "sheep2.friend=" +
sheep2.friend.hashCode());
        System.out.println("sheep3 =" + sheep3 + "sheep3.friend=" +
sheep3.friend.hashCode());
        System.out.println("sheep4 =" + sheep4 + "sheep4.friend=" +
sheep4.friend.hashCode());
        System.out.println("sheep5 =" + sheep5 + "sheep5.friend=" +
sheep5.friend.hashCode());
    }

}
```
